

Be Nice Hospitality Group

Business Plan: \$1M Operator Ecosystem Launch

"Use OTAs for discovery. Run the rest like a business."

Executive Summary

Be Nice Hospitality Group (BNHG) is a training, advisory, services, and technology company for the sharing economy. We help hosts running short-term rentals, long-term rentals, co-living, experiential stays, and platforms like Turo move from owning assets to operating real businesses. Our differentiator: we teach the **operating system**, not the tools, so the business runs the same on Hospitable, Lodgify, or anything else; we operate **Signal**, our AI services agency for boutique luxury hotels; and we run **BNHG Labs**, the innovation arm where co-founder Alex Henry uses Claude Code, n8n, and modern automation to ship AI tools and micro-SaaS — including **Guestally**, our flagship AI concierge platform for property-side operators.

The Opportunity

The 2026 short-term rental market is at an inflection point. Hosts are emotionally fatigued by platform dependency, struggling to execute direct booking, and integrating AI piecemeal. Industry reports describe 2026 as the year hosts must *step into the role of true operators* — and no one in the education space owns that positioning yet. The window to plant the flag is now.

The Operator's Ecosystem: Four Surfaces

Education & Community: Tripwire (\$97), Foundation Course (\$497, Auto or Property), Flagship Course (\$799, Auto or Property), and the Nice Host Network with **two live founder-led sessions every week** (Tue + Thu, 1 hr each, 47 weeks/year).

Advisory — The Operator's Boardroom: Fractional COO partnership at three commitment lengths (3, 6, 12 months) for sharing-economy operators scaling across asset classes. \$7.5K–\$24K.

Signal: Our AI services agency for boutique luxury hotels (10–50 rooms). Productized engagements from \$1.5K Quick Wins to \$20K+ Custom Builds, every offering backed by specific outcome guarantees. Led by Alex.

BNHG Labs: The innovation and product lab. Houses Guestally (\$179/\$299/\$349 per month, Property only) and a growing portfolio of AI tools and micro-SaaS shipped to members first.

Tier 0 (Lead Magnets): A growing library of free resources — audits, playbooks, templates — that fuel the top of every funnel.

Revenue Target

\$1.5M in course-and-advisory launch revenue over 60–90 days, plus parallel arms running: Signal contributing an additional \$150K–\$250K in collected revenue with retainer ARR forming, and a Guestally ARR base projected to reach ~\$540K within 12 months. The course catalog funds the launch; advisory monetizes founder expertise; Signal monetizes Alex's tech expertise at agency margins; Labs builds the recurring software asset.

Leadership

Della Henry & Alex Henry — Co-Founders, BNHG. Della leads brand, education, content strategy, advisory delivery, and the Nice Host Network. Alex leads technology and runs both **Signal** and **BNHG Labs**. **Alex is also Founder & CEO of Guestally**, a separately incorporated company aligned with BNHG that anchors the Labs portfolio.

Market Opportunity & Competitive Position

Market Context (2026)

The US short-term rental market has 1.76M active listings. AirDNA calls 2026 "the best year to invest in STRs since 2021," but only for hosts who understand market selection, dynamic pricing, and operational efficiency. The gap between trained operators and amateurs is widening fast.

Metric	2026 Reality	What It Means
AI adoption among operators	84%	Table stakes; piecemeal use creates the gap
Operators with direct booking sites	70%	Most have the asset
Operators with <25% direct bookings	62%	Almost no one executes well
AI traffic to direct sites (YoY)	+24x	AI search is the new growth channel
ADR growth across major markets	+11–29%	Rate discipline beats occupancy chasing
"Cleaner" mentions in 1,400-host survey	186	Staffing is the silent #1 pain

The Five Pains Hosts Are Voicing

- Airbnb dependency fatigue.** 98% of hosts still use the platform. Trust is gone. They want off the dependency without losing the income.
- The direct booking execution gap.** Everyone knows they should diversify. Almost no one has the system.
- AI fragmentation.** A chatbot here, a pricing tool there. More tools, same chaos.
- The cleaning and staffing crisis.** Operations is the unseen bottleneck.
- Pricing strategy inversion.** Rate-first beats calendar-fill, but most hosts haven't adjusted.

Competitive Landscape

Competitor	Price	Positioning	Gap We Exploit
10XBNB	\$7,000	Beginner / arbitrage	Doesn't serve active operators
BNB Formula	~\$2,500	Cold landlord outreach	Anchored to 2019–2021 strategy
Sean Rakidzich	\$174–\$2,997	Tactical, skill-specific	No systems thinking, no AI integration
Profitable Properties	~\$997	Anti-Airbnb	One man, no software, no community
Udemy / Skillshare	\$15–\$100	Bottom of market	No depth, no implementation
VR Conferences	\$249–\$1,597	Networking, design	Episodic, not systematic

The category we own: The accessible-price professionalization position for existing operators — with built-in community, proprietary AI tech, applicability across STR / LTR / co-living / Turo / experiential, and a clear advisory upgrade path. Nobody else occupies it.

Offer Architecture & Revenue Model

The model is structured around four operating surfaces: education and community, advisory, Signal services, and BNHG Labs. Each serves a distinct buyer at a distinct stage. Together they create a self-reinforcing engine — education and community feed advisory; advisory feeds Signal; Labs ships software that all three sell against; and Tier 0 lead magnets feed the top of every funnel.

The Three Pillars (Curriculum and Marketing Spine)

- 1. **Operate Like a Business** — systems, SOPs, and workflows independent of any specific tool.
- 2. **Automate With Intelligence** — AI integration that does not gut the guest experience.
- 3. **Own Your Guests** — the Return Guest Framework and direct booking conversion engine that turns OTA discovery into long-term relationships.

The Course & Advisory Launch Ladder

Tier	Offer	Price	Sales	Revenue
0 — Lead Magnets	Free audits, playbooks, and templates	\$0	—	—
1 — Tripwire	Direct Booking Playbook (Auto + Property)	\$97	800	\$77,600
2 — Foundation	Foundation Course (Auto or Property edition)	\$497	1,000	\$497,000
3 — Flagship	Host-to-Operator (Auto or Property edition)	\$799	750	\$599,250
4a — Advisory	Operator's Boardroom — 3 month	\$7,500	12	\$90,000
4b — Advisory	Operator's Boardroom — 6 month	\$13,500	8	\$108,000
4c — Advisory	Operator's Boardroom — 12 month	\$24,000	5	\$120,000
LAUNCH REVENUE (90 days)				\$1,491,850

Signal — The Boutique Hotel Services Arm (Parallel Revenue)

Signal is BNHG's AI services agency for boutique luxury hotels (10–50 rooms). Run by Alex, Signal sells productized AI engagements with outcome guarantees. Its sales motion is distinct from the course launch (40-min discovery call → written blueprint → starter engagement → expansion). Four engagement layers: Quick Wins (\$1.5K–\$4.5K), 30-Day Sprints (\$5K–\$10K), Monthly Retainers (\$2K–\$10K/mo), and Custom Builds (\$5K–\$20K+). Realistic 90-day Signal contribution: **\$150K–\$250K in collected revenue plus \$15K–\$30K of monthly recurring forming.** Not bundled with course launch revenue — Signal runs on its own engine.

BNHG Labs — The Tools & Software Engine

BNHG Labs is the innovation arm where Alex builds AI-powered tools and micro-SaaS using Claude Code, n8n, and modern automation. Each tool ships first to Nice Host Network members and advisory clients. **Guestally** anchors the Labs portfolio as the flagship product — an AI concierge for property-side operators, separately incorporated with Alex as Founder & CEO. Three plans: Starter \$179/mo, Growth \$299/mo, Premium \$349/mo. With ~700 Property-edition course buyers and a 25% activation rate, Guestally builds toward **~\$540K in ARR within 12 months.** Future Labs releases (audit generators, screening tools, fleet management AI) extend the portfolio.

Why The Math Works

The course catalog carries 72% of launch revenue across two clean tiers (Foundation and Flagship), each split into Auto and Property editions. Advisory carries 21% at higher margin. Signal runs in parallel on its own engine. Labs compounds for years as Property buyers graduate into Guestally and additional Labs products ship.

Ideal Customer Avatars

Every piece of content, every email, every sales page is written to one of two named avatars. Maya represents the Property edition; Marcus represents the Auto edition. They are not demographics — they are full humans with specific weeks, specific objections, and specific moments when they decide they need BNHG.

MAYA — The Property Operator

FOUNDATION & FLAGSHIP, PROPERTY EDITION

Profile	38 years old, married, 5 properties (3 STR + 2 LTR), suburban Atlanta, \$280K annual revenue, runs operations while spouse contributes capital and a corporate income.
The Moment	Sunday night. She just spent 90 minutes coordinating cleaners, answering a guest complaint about WiFi, and re-pricing a unit on Airbnb. She tells her husband "I built this so I'd have more time, and I have less."
Says to Herself	"I need systems." "I'm tired of being on call." "There has to be a smarter way to do this." "I should be running this like a real business by now."
Already Follows	BiggerPockets, Get Paid for Your Pad, Robuilt, AirDNA, Sean Rakidzich. Reads <i>The E-Myth Revisited</i> , <i>Profit First</i> . Listens to Truth Be Told and STR Unfiltered.
What She's Tried	A \$497 STR course in 2024 (didn't finish), a free Hospitable trial (still uses it but barely scratches the surface), three different cleaners, a VA from the Philippines who quit after 4 months.
Top Objection	"I don't have time to take a course right now." Counter: BNHG community is asynchronous + 2x weekly live with replays. Maya can pop into Thursday's hot seat with her actual problem and walk away with a fix in 30 minutes.
Month 6 Win	She has a documented SOP library, a part-time ops assistant trained on it, Guestally running 3 of her properties, and her first weekend in 2 years where she didn't touch her phone for guest issues.

MARCUS — The Auto Operator

FOUNDATION & FLAGSHIP, AUTO EDITION

Profile	32 years old, single, 3 Turo vehicles netting ~\$3,200/month, IT background, urban or suburban market, growing toward 8–10 vehicles.
The Moment	Saturday afternoon. He's juggling a return inspection, a flat tire ticket, a renter who didn't refuel, and his fourth attempt to find a reliable detailer. He knows scaling to 8 vehicles will break the system, but he doesn't know what to build.
Says to Himself	"I treat this like a business but I don't have a playbook." "There's no real Turo course out there worth taking." "I need someone who's actually scaled this."
Already Follows	Turo CEO on LinkedIn, Carsharing Connection, FleetUp YouTube channels, r/turo on Reddit. Has read <i>The 4-Hour Workweek</i> , listens to MFM and All-In.
What He's Tried	YouTube tutorials, Discord groups, a Turo Facebook group. Cobbled together his own pricing spreadsheet. No formal training, no mentor, no SOPs.
Top Objection	"Is this actually for Turo or just rebadged STR content?" Counter: dedicated Auto edition, taught by people who've operated fleet-shared vehicles, with auto-specific case studies, vendors, and SOPs.
Month 6 Win	He's at 7 vehicles, has a part-time fleet handler, runs a documented turnover protocol, and is training a second handler from his SOP library. His monthly net is up 110%.

Distribution & Content Engine

Most course launches spend \$30K–\$100K on cold paid traffic. We don't have to. The plan is an organic, founder-led distribution engine across six platforms — each with a specific funnel job, all fed by a single weekly anchor. Della and Alex don't write six things; they produce one anchor and slice it.

Platform Job Map

Platform	Job	Cadence	Funnel Role
TikTok Live	Discovery + community magnet	2x weekly Live (Tue 60min)	Cold → Email
Instagram (BNHG + Della)	Operator aesthetic + DM funnel	5 Reels/wk + daily Stories	Email → Tripwire
YouTube (BNHG)	Long-tail authority + AEO	1 long-form/wk	Cold → Course
LinkedIn (Della + Alex)	Advisory pipeline	4 posts/wk each	Direct → Advisory
Threads (Della)	Personality + cross-pollination	Daily	Brand depth
Truth Be Told podcast	Trust builder, audio-first audience	Weekly	Long-form authority

The Weekly Content Engine (One Anchor → Six Surfaces)

Each Tuesday's community workshop topic *is* the week's content theme. From that single anchor, the engine produces every piece of content for every platform — without doubling the founders' creative load.

Day	Asset	Source	Repurposes To
TUE	Community Workshop (live, 1hr)	Della + Alex	TikTok Live (free public version) · YouTube long-form (edit) · LinkedIn carousel
WED	LinkedIn carousel + IG Reel	Tuesday recap	Threads quote post · Email newsletter blurb
THU	Implementation Hour (live, 1hr)	Della + Alex	Hot-seat clip → IG Reel · LinkedIn case study · Threads thread
FRI	Truth Be Told podcast episode	Weekly theme	YouTube clip · 3 IG Reels · LinkedIn long-form
SAT	BNHG Labs build update (Alex)	Real Claude Code/n8n work	LinkedIn build-in-public post · YouTube Shorts · IG Reel
SUN	Member spotlight or operator story	Community wins	IG carousel · LinkedIn case study · Email

The Three Audience-Building Principles

1. **Live before recorded.** TikTok Live and the Tuesday/Thursday community sessions create the relationships. Recorded content scales them. Lead with live; let recorded content compound.
2. **Every CTA goes to one of three places.** The Free Audit, the Tripwire, or the Community login — never anywhere else. Funnel discipline beats funnel cleverness.
3. **Founders show up unedited.** Highly-produced content underperforms founder-led messy honesty in 2026. Della's TikTok Live works because it's real. Alex's Labs build videos work because the code is on screen. Don't over-polish.

12-MONTH AUDIENCE TARGETS

TikTok (Della) **25K** · Instagram (BNHG + Della) **30K** · YouTube (BNHG) **8K** · LinkedIn (Della + Alex) **22K** · Email list **15K**
· Truth Be Told podcast **Top 10** in category

Advisory Personas & Go-to-Market

While Maya and Marcus represent the course buyer at the front of the funnel, the advisory tier serves a distinctly different operator — one who has outgrown course-and-community and needs partnership. Boutique hotel owners are routed to **Signal**, our productized AI services arm for that audience. The remaining six sub-personas for the Operator's Boardroom are below.

The Advisory Buyer (Tier 4 — \$7.5K–\$24K)

5–25 properties, \$400K–\$2M in annual business revenue. They've outgrown courses and want partnership, not information. They calculate \$24K as 3–6% of revenue — a small line item for someone who knows what their time is worth. They are *operators becoming CEOs*. Six sub-personas:

Persona	Profile & Pain	Best Tier
Married Operator Couple	8–15 properties; one spouse runs ops, the other contributes capital. Bread-and-butter ICP.	6 or 12 mo
Reluctant Real Estate Investor	10–20 properties; expected passive income, found a full-time business. Wants out of day-to-day.	6 mo
Aggressive Growth Operator	Wants to scale 8 → 50 properties in 18 months. Becomes case study, podcast guest, referral engine.	12 mo
Co-Living Founder	1–3 buildings, 10–30 doors. Underserved white space — almost no serious competition.	6 or 12 mo
Multi-Asset Innovator	STR + Turo + co-living. Most philosophically aligned with BNHG. Highest LTV.	12 mo
Selling Founder	Building toward exit. Needs professionalization for due diligence. Pays fast.	3 or 6 mo

Go-to-Market Strategy

The single highest-leverage move: Della on 8 STR podcasts in 30 days. The STR podcast ecosystem (Get Paid for Your Pad, STR Unfiltered, BiggerPockets STR, Hosting Hotline, Thanks for Visiting, Hospitable.com Hosts) hosts the warmest, highest-intent audience in the industry. Each guest spot is worth ~\$20K–\$50K in launch revenue — and the same rooms are where advisory buyers listen. **Supporting channels:** Della's content engine (LinkedIn, IG, YouTube, Threads, Truth Be Told), Alex's CEO/tech LinkedIn, the BNHG weekly content engine, an affiliate program (20 STR influencers at 30–40% commission), and direct LinkedIn outreach to advisory ICPs.

90-Day Launch Sequence

Phase	Window	Key Actions	Revenue Target
Build	May 1–14	Course shoot, lead magnet, community standup, tech infrastructure, podcast booking —	
Soft Launch	May 15–31	Live workshop, founding pricing (\$397 for first 200), advisory apps open	\$150K–\$250K
Mega Launch	June 1–30	5-day challenge, affiliate launch, 3 live AMAs, advisory outreach	\$500K–\$700K
Sustain	July 1–31	Evergreen funnel, second pricing wave, Guestally activation campaigns	\$200K+

Team, Operations & Vision

Leadership

Della Henry — Co-Founder, BNHG. Operator background across STR, LTR, and co-living. Leads brand, education, content strategy, and advisory delivery. Established personal brand across LinkedIn, Instagram, YouTube, Threads, and the Truth Be Told podcast.

Alex Henry — Co-Founder, BNHG; Founder & CEO, Guestally. Architect of the Guestally AI concierge platform, and head of **BNHG Labs** — the innovation arm where Alex uses Claude Code, n8n, and modern automation to build AI tools and micro-SaaS for the sharing economy. Each tool ships first to Nice Host Network members and advisory clients, creating a flywheel between curriculum, community feedback, and real production software.

What Gets Built in May

Asset	Purpose
Foundation Course (2 editions)	Auto edition + Property edition; ~70% shared core, 30% asset-specific
Flagship Course (2 editions)	Host-to-Operator: team-building & systems, Auto + Property editions
BNHG Labs portfolio	Alex ships Guestally + Audit Generator + Bernice Sandbox; Claude Code, n8n
Signal productization	Document Quick Wins + Sprints as repeatable playbooks; reduce Alex bottleneck
Course Platform + Guestally Integration	Native trial flow on enrollment (Property buyers only)
Advisory Intake Portal	Application, calendar booking, Stripe checkout, onboarding
Signal Discovery Funnel	40-min discovery call booking flow; written blueprint template

Risks & Mitigations

Course completion. Most students never finish. Mitigation: gate Guestally Pro trial extension behind module completion, layer accountability inside the community.

Founder-led community cadence. The 2x weekly live commitment (Tue + Thu, 1 hr each) is the differentiator and the biggest time investment. Planned breaks: 1 week per quarter (align with industry lulls — late March, early July, early October) plus 2 weeks in December. Frame as "47 weeks of live sessions per year."

Advisory client filtering. Wrong-fit clients eat calendar and damage case studies. Use the six personas as the filter. Application-only, no public price.

FTC compliance. Position around operational outcomes (hours saved, direct booking %, retention) — never income claims.

Founder capacity. 60–80 launch hours over 8 weeks. Block calendars now; defer non-launch projects.

Long-Term Vision

Education and community fund the launch. Advisory monetizes founder expertise. Signal monetizes Alex's tech depth at agency margins for the boutique hotel market. **Labs compounds the technology moat** — every tool that ships strengthens credibility and creates a new revenue surface. The 24-month outlook: **5,000+ Nice Host Network members, \$1.2M+ Guestally ARR, a Labs portfolio of 3–5 shipping products, a Signal book of business with \$30K+ MRR in retainers, and recognized category leadership for the sharing-economy operator class.**

The category we plant a flag in: The operator's training company for hosts who are done playing — taught by people running it, powered by the AI tech they built, structured around systems that work no matter what platform you're on.
